Science

Class of 2011 Yearbook

101

Science 101

is a 4-month summer program offered to individuals who have had difficulty accessing post-secondary education.

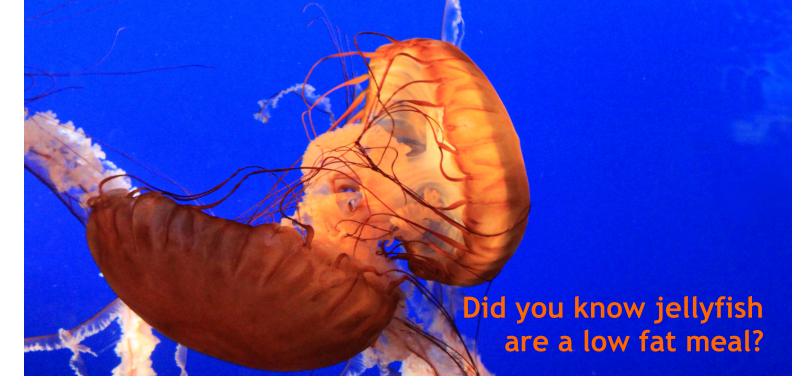

There are no fees associated with the course and no pre-requisite knowledge is required. No university credit is given upon completion. The program is sponsored by the University of British Columbia Faculty of Science Dean's Office and private donations.

The objective of the program is to give students an introduction to topics in science, to help them better understand the world around them, to broaden their perspectives, and to have fun with science.

Students enrolled receive lectures from University of British Columbia professors and students about fascinating topics in Science. Students are also given the opportunity to attend tutorial sessions as well as field trips in the Vancouver area. One of which, an evening at the H. R. MacMillan Space Centre, is an event open to the public and students are encouraged to bring family and friends.

A graduation ceremony is held at the end of the program to honor the students who have competed the program.

Volunteers are an important part of the program and are available to provide assistance to students inside and outside of class.

Academics

At the end of the Science 101 program students are required to complete a final project. The purpose of the final project is to give students the opportunity to further explore a scientific topic of their choice and to share with others what they have learned. The topic may be something previously covered in class or only briefly touched upon. The only requirement is that the topic is scientific and relevant to the course.

Students are given the opportunity to display their projects at the graduation ceremony.

The projects involve a wide range of topics and are often presented in a variety of formats, including posters.

Did you know butterflies undergo a complete metamorphosis?

A message from Dr. Simon Peacock, Dean of Science

Dear graduates,

On behalf of the Faculty of Science, congratulations on your graduation from Science 101!

When looking back on what you have learnt through the Science 101 program, I hope you'll find you now have a better understanding of science and have gained new perspectives on the world around you. The knowledge and insight you have acquired provides you with a foundation to more fully understand and approach scientific topics you may encounter in the future, either in you everyday life or academically.

Science 101 has provided you with an excellent introduction to many scientific topics and has hopefully ignited your passion to continue learning about science.

Congratulations on your achievement!

Sincerely yours,

Simon Peacock Dean Faculty of Science

Did you know the first microscope invented was optical?

A message from Amanda Catching, Program coordinator

The Road Not Taken By Robert Frost

Two roads diverged in a yellow wood, And sorry I could not travel both And be one traveler, long I stood And looked down one as far as I could To where it bent in the undergrowth;

Then took the other, as just as fair, And having perhaps the better claim Because it was grassy and wanted wear, Though as for that the passing there Had worn them really about the same,

And both that morning equally lay In leaves no step had trodden black.
Oh, I marked the first for another day!
Yet knowing how way leads on to way I doubted if I should ever come back.

I shall be telling this with a sigh Somewhere ages and ages hence: Two roads diverged in a wood, and I, I took the one less traveled by, And that has made all the difference.

One thing all of us at Science 101 have in common is that we have chosen that less traveled road. Sometimes it has made our lives harder but more importantly it has made them richer and more interesting. Every student at Science 101 has a unique and compelling story to tell and gift to offer the world.

Being the Science 101 coordinator is the most rewarding job I have ever had and it is you, the students, that have made it so. I have really enjoyed getting to know you all and have learned something from each and every one of you. I wish all of you the greatest success and hope that you will keep me updated on all of your adventures.

I hope you enjoyed the program and look forward to seeing you all at alumni events in the future.

Best Wishes,

Amanda

Did you know flowering plants are also called angiosperms?

A message from Leigh Hobbs, Program Coordinator

Dear Graduates,

Once again, the final days of Science 101 have left me with mixed emotions. As pleased as I am to see you successfully complete the program, I feel that I am just getting to know many of you. You've definitely made life interesting. Your perspectives and comments were insightful and you always made me laugh. You were so inquisitive and eager to learn about whatever topics were being presented; areas as diverse as astronomy, physiology and botany were met with the same degree of interest and speculation. Doubtless, this was in no small part due to the lecturers who so generously donated their time to the program. The passion they have for their fields, and learning in general, made it easy to share in the enthusiasm they generated in the classroom.

While the quality of the students and the lecturers are critical to the success of the program, there are many others whose work behind the scenes is just as invaluable. Amanda, it was great to work with someone with such passion for the program. Thank you to Nancy and Dr. Cavers for their support. Without you, the Science 101 program would never have got off the ground.

Science 101 is such an amazing program. It truly gives students the opportunity to make positive changes in their lives, which is something that is so wonderful to see and to, hopefully, be a small part of. I am so glad I was able to be involved with the program a second year and once again have learned a lot from the experience, both inside and outside the classroom.

I wish you the best of luck in your future pursuits. Congratulations to this year's graduates!

Sincerely,

Leigh

The students

Jose Gutierrez

"My most memorable experience was learning about surface tension because I [always] thought water was flat".

For his final project Jose researched "the importance of vitamin C... How we get it, how some animals get it, and its benefits."

"I would like to tell [those involved with Science 101]... thanks. This program is very good and makes us more aware of very important things". Science 101 helps us "develop our curiosity which is the most important thing to get knowledge".

Jose in the gondola going up Grouse Mountain.

Jose encourages his Science 101 classmates to keep their hunger for knowledge alive!

Jose looking pensive during a Science 101 lecture.

Thomas Beirne

My most memorable experience in Science 101 was when Jaymie Matthews told us "we are the Goldilocks planet out of some 500 or 600 odd planets."

The topics Thomas found most engaging were the chimera mouse and genetics.

For his final project Thomas researched the Science of law in Canada and BC.

"The more I come here the more I feel I belong. Talking with [my classmates I learnt] there are quite a few others that feel the same way".

Thomas and Brian at "Tree top adventures" at the Capilano Suspension Bridge.

Thomas making ice cream.

David Deocera

found learning about flora and fauna very interesting. "Learning about how they interact... with each other is very enlightening".

"Life in general is a never ending quest for learning, appreciation, and wonder of all the things around us".

Science 101 has helped David in his future pursuits. The program "opened my eyes to the importance of biodiversity. I am starting a project in my home country, the Philippines, called Community Reforestation Project".

David talking with and Jose.

David in a Science 101 lecture.

"The whole [Science 101] experience is simply spectacular. I enjoyed every moment in the class. The teachers are exceptional, the staff are super approachable, and the volunteers exceeded the expectations".

Donna Gorrill

The topics Donna found most engaging were "The Mathematics of Evil" and "Zero Sum Game Theory". She now knows how to beat the computer at chess!

When asked if Science 101 contributed to her understanding of the world she replied, "Yes, are you kidding!? It is a big world out there and beyond..."

For her final project Donna researched the optical meteorological phenomenon called rainbows... cause by light refraction on water droplets.

Donna with Chad, a volunteer, during a Science 101 lecture.

Charlize, Phyllis, Georgia, and Donna in Stanley Park.

To her Science 101 classmates Donna says, "Thanks for the memories!"

"I appreciate the instructors, coordinators, mentors, and volunteers who contributed to Science 101".

Brian Wheatley

"My most memorable experience was... the pharmaceutics lecture. [There were] so many fascinating educated comments".

Brian at TRIUMF Laboratory for Particle and Nuclear Physics.

Jose, Susan, and Brian waiting for the gondola to go up Grouse Mountain.

The Science 101 program helped him realize that the Earth is indeed round. He's now seen the evidence!

"Learning Science is a life long pursuit and you don't need to be in [the classroom] to learn it".

To his classmates Brian says, "The Science 101... space shuttle has unfortunately ended, but it can fly again for yet another adventure".

Kelly Hilton

Found learning about space, the moon, the stars, and dark matter most engaging. "Describing the things we see in the sky and their behaviour".

Kelly outside TRIUMF Laboratory for Particle and Nuclear Physics.

"Attending Science 101 was informative about several Science categories. The field trips were exciting and educational!" "[Science 101] is fun. Take it. I'm very thankful I did."

The title of Kelly's final project was "The Beauty of Science" since science brought clarity to the questions she has often pondered.

"It was wonderful getting to know many of the students, their history, their dreams".

Peter Newbury helping Kathleen and Kelly during his lecture on "Fixing the Universe".

Kathleen Still

says "Science 101 will enhance your life". The program contributed to her understanding of the world. She learned about genetics and how life-forms are created" and "gained a greater understanding of the natural world and how life grows".

Kathleen gained knowledge she can apply in her everyday life. Learning about plant reproduction, Botany, and Chemistry will help her have a greater yield in her vegetable garden. She was able to relate to [much] of the subject matter.

Kathleen and James inspecting a plant in Camosun Bog.

Kathleen making ice cream.

"I would definitely recommend Science 101 to future students. As a result of taking [the program] my total well-being improved. I always looked forward to class. [Attending] class was a top priority".

For her final project Kathleen researched Community Gardens and how they impact people's wellbeing.

Susan Knudsen

"My most memorable experience was the field trip to Grouse Mountain where I was able to zipline amidst the clouds!"

All the topics were interesting and I especially enjoyed the Introduction to Pharmaceutics II with Dr. Mona Kwong... We made hand cream and had a great discussion".

Susan on the gondola going up Grouse Mountain.

To her classmates Susan says, "It's been a pleasure to learn with you. May all your future educational endeavors be as rewarding".

Upon completing the program Susan hopes to continue to study Math.

Susan using a telescope to look at the moon.

Mark Shum

For Mark, Science 101 "explained a lot of questions that were burning a hole in [his] soul".

To his classmates Mark says, "Enjoy the learning experience, if you've got an itch to learn!".

For his final project Mark researched the Terahertz camera, which is used in airports, prisons, and is "coming to a hospital near you!"

Dave, Mark, Thomas, and Leigh, program coordinator, on a tour of TRIUMF Laboratory for Particle and Nuclear Physics.

Mark and Virginia at a Botany lab.

Jeff Feinstein

Jeff's most memorable experiences were "the great understanding shown by instructors and people running the program".

Science 101 reminded him of the importance of Science. "It was a great inclusive learning experience".

Jeff using a telescope to look at the moon.

Mark, Virginia, and Jeff in a Science 101 lecture.

For his final project Jeff researched the Physics of Music. "How sound frequencies translate into music harmony".

To his classmates Jeff says, "Thanks for being so collegial".

Robert Bremner

learned many things in Science 101. He was inspired. "Every class was equally as good, however, Respiratory Physiology was very relevant" to his experiences as a CPR instructor.

Science 101 has given him a "deeper understanding of human relationship... on this planet".

For his final project Robert researched "the role of the Perfusionist during surgery to control [the flow of oxygenated blood to the] heart and lungs" and how "climate change and tectonic plates [cause a] disruption of cycle causing havoc, such as earthquakes".

Robert using a telescope to look at the moon.

Robert speaking with Peter Newbury.

Science 101 was "a very supportive learning environment, an extraordinary opportunity... Thank you UBC".

Charlize Gordon

Some of Charlize's most memorable Science 101 experiences were the Grouse Mountain trip and the first class on sound waves.

"I was already on my way [to understanding the world around me]. Now I have a better appreciation of the planet I live on. I would like to pursue another year of learning about the world around me".

Charlize making ice cream.

The topic of Charlize's final project is sound and hearing, specifically pertaining to Tinnitus.

"Thanks for a great term".

Donna, Charlize, and Lisa, a volunteer, in a Science 101 lecture.

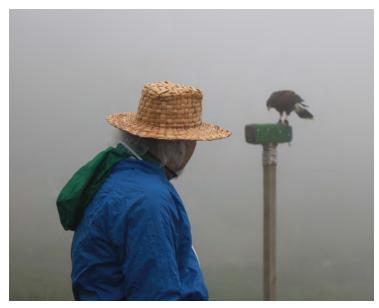

James Vassiliou

Science 101 contributed to James' understanding of the world. "So much to... learn [and] know. The vastness of the cosmic geological and biological time. The awe and wonder of it all".

When asked to describe his learning experiences, James replied "the wow factor".

James, Chad, and Shona Ellis in Camosun bog.

James watching the bird show at Grouse Mountain.

Rajendra Prasad

learned many things in Science 101. The lectures help him understand himself, the human body and mind, right down to DNA, genes, traits and addictions.

For his final project Raj researched Mendelian genetics. More specifically the genes that cause the physical traits.

Raj using a telescope to look at the moon.

Kelly, James, and Raj.

Raj would like to express tons of gratitude towards the Science 101 program. "Leigh and Amanda, the two coordinators, your time with us was priceless. Volunteers, thank you to each one of you who taught us. Thank you for opening this place where wisdom is a gift. I will in my time learn as much as I am allowed to."

Victor Jean

Victor's most memorable experience was making hand cream. He found Evolution to be the most interesting topic. As a result he chose to research Evolution for his final project.

Science 101 helped him in his future pursuits by "answering some questions [he] had about the world around him".

Victor and Lisa, a volunteer, using a telescope to look at the moon.

Victor outside the Irving K Barber Learning Centre, UBC campus.

To his classmates Victor says, "Keep on the learning way". "I enjoyed the diversity of my classmates and their commitment to learning".

Virginia Shum

Virginia's most memorable experiences were making hand cream and ice cream.

Science 101 helped her "understand the world better".

Virginia dissecting plants at the Botany lab.

Virginia recommends Science 101 to prospective students since "one can [always] learn more".

Visiting Camosun bog with Shona Ellis.

Stephen Kinnis

"I really liked learning about astronomy. The discussion we had with Jaymie Matthews was very interesting".

"I liked learning about the structure of the cell, but I [now] realize that an introductory information session can not explain its intricacies". The topic of his final project is the Anatomy of the Cell.

Stephen using a telescope to look at the moon.

Field trip to Camosun bog with Shona Ellis.

"I think these UBC courses are inspiring... [I would] especially recommend [the program] to people in the DTES".

Dave Leblanc

"The whole [Science 101] experience has been quite the pleasure; the field trips, the lectures. There was not a dull moment".

Dave found every topic engaging since all the lecturers were so knowledgeable in their fields.

Dave in Camosun bog.

For his final project Dave researched Pseudoscience since he would like people to know "there's what you know and what you can prove".

"Thank you very very much. You've inspired me and given me hope".

Dave eating ice cream during the Pharmaceutics Lab.

Megan Muir

Megan's most memorable experiences were "being on Grouse Mountain in mid summer surrounded by clouds and snow! The fish lecture was so incredible [and was] made even better with the trip to the aquarium where the professor showed us the creatures we learned about alive and up close!"

"Jaymie Matthews' Astrophysics lectures were amazing! He was able to make complex concepts understandable and he answered a question I've had since I was young: If the universe is actually expanding, into what is it expanding?"

Megan in class.

Megan using a telescope to look at the moon.

For her final project Megan researched how to build a rain water collecting system for you apartment balcony.

"I studied Science in university ten years ago and this class has revived my scientific understanding... By having lectures on such a variety of topics led by experts who excel at translating their world into everyday language I feel so much more confident returning to school. The love of learning in contagious - I've definitely caught the bug".

To her classmates Megan says, "Keep learning and keep teaching. You've proven that we all have something valuable to share".

Phyllis Lester

Phyllis enjoyed all the subjects. There were lots of fun and interesting topics discussed. The Open House at the HR MacMillan Space Centre was an especially memorable experience.

Phyllis and Georgia out front of the Irving K Barber Learning Centre on UBC campus.

"It was good to meet all these people. I enjoyed hearing [your] input".

Phyllis, Mark, and Stephen with Peter Raven at the Vancouver Aquarium.

Ronald Rizetto

aka Rockin' Ronnie

One of Ronnie's most memorable experiences was performing in front of the class with his harmonica and guitar during the acoustics of string instruments lecture, one of his favorite topics.

Ronnie using a telescope to look at the moon.

Ronnie making ice cream.

Ronnie researched the Science of healing through music for his final project.

"I look at Science and the world from a different light and new perspective. My mind is open to new educational possibilities".

To his classmated Ronnie says, "I believe in all of you. You are my family and fellowship. Expand your horizons and seek knowledge". "Knowledge is wisdom and power and strength in numbers".

"I appreciate everyone in Science 101: the staff, the contributing lecturers, and students as a whole".

Alumni mentors

Georgia Kelly

Georgia, a former Science 101 student, says she "thoroughly enjoyed the two years she spent in Science 101. [It was] time well spent!" She really enjoyed all the outings. They were great opportunities to get to know the students better.

To the Science 101 students she says, "You're the greatest. It's been a slice! The enthusiasm was infectious!"

Georgia doing a surface tension experiment.

Brett Lindsey

Brett completed the Science 101 program in 2010. Returning as a mentor he enjoyed "all the great personalities in the class". He encourages this years' class to "follow their dreams".

Brett at the HR MacMillan Space Centre.

The volunteers A message from Chad Atkins

Dear Graduates,

"The important thing in Science is not so much to obtain new facts as to discover new ways of thinking about them".

-Sir William Henry Bragg

Continue to think and challenge your boundaries.

Chad

Chad touching a meteor at the HR MacMillan Space Centre.

Lisa and Raj using a telescope to look at the moon.

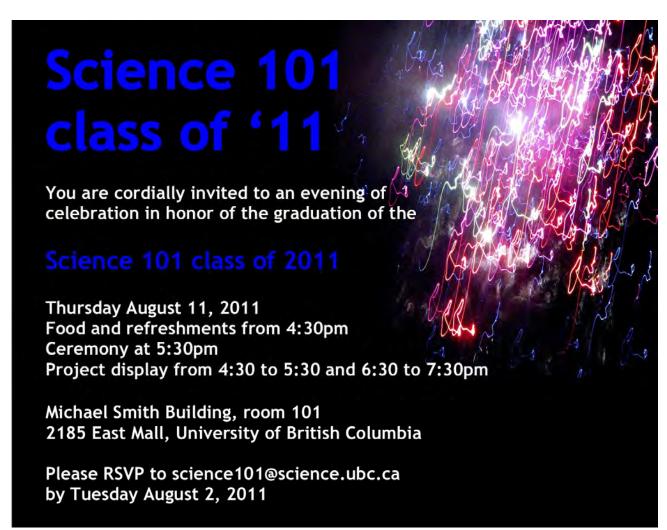

A message from Lisa Wong

Dear Graduates,

Over the past few months, many of you were kind enough to share your stories, life experiences, and wisdom with me during the various lectures, field trips, and tutorials. I benefited from those moments in more ways than I can say. I hope you all enjoyed discovering science this summer. Learning alongside all of you has been a truly unique and amazing experience for me. Your curiosity and enthusiasm about science are both inspiring and infectious - thanks for sharing!

Lisa

Graduation invitation

Acknowledgments

We are thankful to those that helped make the Science 101 Program possible.

Dean's Office, Faculty of Science, University of British Columbia

Dr. Simon Peacock, Dean of Science

Dr. Ian Cavers, Associate Dean of Curriculum and Learning

Dr. Paul Harrison, Associate Dean of Student Services

Nancy Cook, Teaching and Curriculum Coordinator

Program coordinators

Amanda Catching & Leigh Hobbs

Lecturers

Dr. Anthony Griffiths, Dr. Chris Waltham, Dr. Eugene Barsky, Dr. Jaymie Matthews, Dr. Chris Addison, Dr. Jim Rupert, Dr. Andrew Mosi, Eric Johnson, Dr. Phil Hammer, Rodolfo Dominguez, Dr. Phil Austin, Dr. Shona Ellis, Dr. J. C. Ambrose, Peter Raven, Ciaran Llachlan Leavitt, Kate Pettem & Julie Robillard, Dr. Peter Newbury, Alan DeBono, Dr. Julian Davis, Dr. Mona Kwong, Norman Flynn
